

NotesBook

A full-stack **Notes App** built with **Next.js**, allowing users to sign up, log in (with email/password or Google), and manage their personal notes in a dashboard. Authentication is required to access the dashboard and perform note operations.

Live Demo

Deployed on Vercel: <https://notesbook-roan.vercel.app/>

Github Link: <https://github.com/techjmi/notesbook>

Tech Stack

- Frontend: Next.js 14 (App Router)
 - Styling: Tailwind CSS
 - Authentication: Firebase (Google Login), JWT, bcryptjs
 - Database: MongoDB (with Mongoose)
 - HTTP Client: Axios
 - Icons: React Icons
 - Notifications: React Toastify
-

Folder Structure

Frontend Routes (in /app directory):

Path	Purpose
app/login/page.js	Login page
app/signup/page.js	Signup page
app/profile/page.js	User profile
app/notes/allnotes/page.js	View all notes
app/notes/create/page.js	Create a new note
app/notes/edit/[id]/page.js	Edit a note
app/notes/view/[id]/page.js	View a single note

Components & Utilities:

- src/components/ – Reusable React components
- src/lib/firebase.js – Firebase configuration
- src/utility/googleLogin.js – Google login utility function

Backend API Routes (in /app/api):

Route	Method	Description
/api/auth/signup	POST	Register a new user
/api/auth/signin	POST	Sign in user with email & password
/api/auth/logout	GET	Logout the user
/api/auth/google	POST	Login/register via Google OAuth
/api/notes	GET, POST	Get all notes / Create new note
/api/notes/[id]	PUT, DELETE	Update or delete a note by ID

Models (in app/api/model/):

- User.js – Mongoose schema for users
- Notes.js – Mongoose schema for notes

Authentication

- JWT-based authentication is used to protect note-related routes.
- The token is stored and sent in HTTP-only cookies.
- Google login is handled via Firebase and integrated with the app backend for storing user data.

Postman API Testing

1. Signup

POST /api/auth/signup

Body (JSON):

```
{  
  "name": "John Doe",  
  "email": "john@example.com",  
  "password": "yourpassword"  
}
```

2. Signin

POST /api/auth/signin

Body (JSON):

```
{  
  "email": "john@example.com",  
  "password": "yourpassword"  
}
```

3. Google Login

POST /api/auth/google

Body (JSON):

```
{  
  "name": "John Doe",  
  "email": "john@example.com",  
  "image": "https://example.com/image.jpg"  
}
```

4. Create Note

POST /api/notes

Headers:

Cookie: token=your_jwt_token

Body (JSON):

```
{  
  "title": "My First Note",  
  "content": "This is the content of the note."  
}
```

5. Get All Notes

GET /api/notes

Headers:

Cookie: token=your_jwt_token

6. Edit Note

PUT /api/notes/{id}

Headers:

Cookie: token=your_jwt_token

Body (JSON):

```
{  
  "title": "Updated Note Title",  
  "content": "Updated content of the note."  
}
```

7. Delete Note

DELETE /api/notes/{id}

Headers:

Cookie: token=your_jwt_token

Protected Features

You must be logged in (JWT token required) to:

- Access the dashboard
 - View all notes
 - Create, edit, or delete notes
 - View user profile
-
